Date May 14, 2025

To whom it may concern

EU RoHS – Directives (EU) 2011/65 and (EU) 2015/863
KACO new energy products

We have received your inquiry regarding our compliance with the restrictions on hazardous substances in electrical and electronic equipment.

We would like to inform you about the products of KACO new energy as follows:

For products supplied by KACO that fall under the scope of the RoHS Directive (EU) 2011/65, we confirm that they meet the requirements of the RoHS Directive. The conformity of these products with the RoHS Directive (EU) 2011/65 or with the corresponding national laws is expressed by the EU Declaration of Conformity.

In March 2015, the RoHS Directive (EU) 2011/65 was supplemented by the Delegated Directive (EU) 2015/863 with further substance restrictions. In addition to the six substances already regulated, the substances di(2-ethylhexyl)phthalate (DEHP), butylbenzylphthalate (BBP), dibutylphthalate (DBP) and diisobutylphthalate (DIBP) were added.

The four new substance restrictions will apply to products in categories 1-7, 10 & 11 from July 22, 2019 and to products in categories 8 & 9 from July 22, 2021.

For KACO products, we confirm compliance with the delegated directive (EU) 2015/863 regarding substance restrictions no later than the entry into force of the delegated directive of the respective product categories.

Special or supplementary requirements must be specified in separate agreements.

Sincerely yours,

KACO new energy GmbH – A Siemens Company
